| Hersteller Artikelnummer | 32-9205                                                                                                                                                                                                                                                       |
| Alternativnummer         | ABI-32-9205-50UG                                                                                                                                                                                                                                              |
| Hersteller               | Abeomics                                                                                                                                                                                                                                                      |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Source : E. coli,CCL16 is a member of CC chemokine family. CCL16 cDNA encodes a 120 amino acid peptide along with a 23 amino acids signal peptide that is cleaved to generate 97 amino acid protein. CCL16 is distantly related to other CC chemokines, sh... |
| Antibody Type            | Recombinant Antibody                                                                                                                                                                                                                                          |
