BAY 11-7082

FBM-10-1296

| | |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Artikelname | BAY 11-7082 |
| Artikelnummer | FBM-10-1296 |
| Hersteller Artikelnummer | 10-1296 |
| Alternativnummer | FBM-10-1296-10MG,FBM-10-1296-50MG |
| Hersteller | Focus Biomolecules |
| Kategorie | Biochemikalien |
| Produktbeschreibung | IKK inhibitor... |
| Molekulargewicht | 207.27 |
| Reinheit | 98% by TLC |
| Formulierung | Off-white solid |
| CAS Nummer | [19542-67-7] |
| Formel | C10H9NO2S |
| Anwendungsbeschreibung | BAY 11-7082 selectively inhibits TNF-induced phosphorylation of κ -alpha leading to decreased nuclear NF-kappaB and decreased adhesion molecule expression without affecting constitutive κ -alpha phosphorylation. ¹ The effects on adhesion molecule expression were found to be irreversible. |
