Product Datasheet

Disopyramide, CAS [[3737-09-5]] FBM-10-4302

Artikelname	Disopyramide, CAS [[3737-09-5]]
Artikelnummer	FBM-10-4302
Hersteller Artikelnummer	10-4302
Alternativnummer	FBM-10-4302-50MG,FBM-10-4302-250MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Sodium channel blocker...
Molekulargewicht	339.48
Reinheit	>98% by TLC, NMR (Conforms)
Formulierung	White solid
CAS Nummer	[3737-09-5]
Formel	C ₂₁ H ₂₉ N ₃ O
Anwendungsbeschreibung	Disopyramide is a clinically useful sodium channel blocker used as an antiarrhythmic for treatment of ventricular tachycardia ¹ and hypertrophic cardiomyopathy ² . It decreases the rate of diastolic depolarization, decreases the upstroke velocity and increases the action potential duration of normal cardiac cells. It decreases the disparity between infarcted and normal myocardium refractory periods. Disopyramide has no effect on alpha or beta-adrenergic receptors but does display significant anticholinergic effects. ³
