Product Datasheet

IACS-010759, CAS [[1570496-34-2]] FBM-10-4475

Artikelname	IACS-010759, CAS [[1570496-34-2]]
Artikelnummer	FBM-10-4475
Hersteller Artikelnummer	10-4475
Alternativnummer	FBM-10-4475-5MG,FBM-10-4475-25MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Mitochondrial Complex I Inhibitor...
Molekulargewicht	562.57
Reinheit	>98% by HPLC NMR (Conforms)
Formulierung	White to off-white solid
CAS Nummer	[1570496-34-2]
Formel	C ₂₅ H ₂₅ F ₃ N ₆ O ₄ S

Anwendungsbeschreibung	<p>IACS-010759 (1570496-34-2) is a potent ($IC_{50} = 1.1$ nM isolated mouse complex I) and selective inhibitor of complex I of the mitochondrial electron transport chain (OXPHOS). IACS-010759 displayed in vivo efficacy in glycolysis-deficient glioblastoma and AML models without cytotoxicity to normal cells. The lack of cytotoxicity to normal cells, as opposed to other complex I inhibitors, is attributed to its unique binding location on complex I.² Complex I inhibition by IACS-010759 causes an ROS-induced decrease in the endogenous PP2A inhibitor CIP2A leading to cell death.³ It has also displayed potential in various chemotherapy-resistant cancer cell lines.⁴⁻⁷</p>
