Product Datasheet

20(S)-Hydroxycholesterol, CAS [[516-72-3]] FBM-10-4540

Artikelname	20(S)-Hydroxycholesterol, CAS [[516-72-3]]
Artikelnummer	FBM-10-4540
Hersteller Artikelnummer	10-4540
Alternativnummer	FBM-10-4540-1MG,FBM-10-4540-5MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Smoothened activator...
Molekulargewicht	402.66
Reinheit	98% by TLC, NMR (Conforms)
Formulierung	White solid
CAS Nummer	[516-72-3]
Formel	C27H46O2
Anwendungsbeschreibung	20-(S)-Hydroxycholesterol is an endogenous ligand for the LXR receptor. ¹ It has anti-adipogenic and pro-osteogenic effects in mesenchymal stem cells mediated via a non-LXR dependent pathway. ² The osteogenic effects of 20-(S)-hydroxycholesterol have been shown to be mediated by activation of hedgehog signaling and expression of genes associated with Notch signaling. ³ Activation of Hedgehog is mediated via binding of 20(S)-hydroxycholesterol to Smoothened at a site distinct from the cyclopamine binding site. ^{4,5}
