Intelliscreen(TM) Neuropathic Pain Ion Channel Mini-Library FBM-10-7310

Artikelname	Intelliscreen(TM) Neuropathic Pain Ion Channel Mini-Library
Artikelnummer	FBM-10-7310
Hersteller Artikelnummer	10-7310
Alternativnummer	FBM-10-7310-1LIBRARY
Hersteller	Focus Biomolecules
Kategorie	Sonstiges
Produktbeschreibung	Comprises 12 inhibitors of various ion channels involved in pain transmission...
Formulierung	Supplied as DMSO solution 10mM
Anwendungsbeschreibung	Neuropathic pain is caused by damage or dysfunction to peripheral or central nervous system nerve fibers and is frequently chronic in nature. Persistent increased excitability and spontaneous activity in neurons leads to chronic pain that is difficult to treat. As the perception of pain is frequently transmitted via the activation of various ion channels, pharmacological modulation of these channels offers great therapeutic potential.
