| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                     |
| Applikation              | ELISA                                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | This Human Alpha-2-Heremans Schmid Glycoprotein (aHSG) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biologicala... |
| Detektionsbereich        | 0.468-30ng/mL                                                                                                                                                                                                                                                   |
| Sensitivitaet            | 0.22ng/mL                                                                                                                                                                                                                                                       |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                          |
| Target-Kategorie         | Human Alpha-2-Heremans Schmid Glycoprotein (aHSG)                                                                                                                                                                                                               |
| Anwendungsbeschreibung   | Assay Length: 4.5 hours. Experimental Method: Sandwich                                                                                                                                                                                                          |
