| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                 |
| Applikation              | ELISA                                                                                                                                                                                                                                                       |
| Spezies Reaktivität      | All                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This General Glutathione (GSH) ELISA Kit is a precoated, Competitive Inhibition ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates and other biological fluids . This product is for Research Use Only.... |
| Detektionsbereich        | 1.56-100µg/mL                                                                                                                                                                                                                                               |
| Sensitivitaet            | 0.059µg/mL                                                                                                                                                                                                                                                  |
| Proben                   | serum, plasma, tissue homogenates and other biological fluids                                                                                                                                                                                               |
| Target-Kategorie         | General Glutathione (GSH)                                                                                                                                                                                                                                   |
| Anwendungsbeschreibung   | Assay Length: 4.5 hours. Experimental Method: Competitive Inhibition                                                                                                                                                                                        |
