| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This Human Endocrine Gland Derived Vascular Endothelial Growth Factor (EG-VEGF) ELISA Kit is a precoated, Sandwich ELISA assay designed to detect and quantify the target analyte in serum, plasma, tissue homogenates, cell lysates, cell culture superna... |
| Detektionsbereich        | 15.6-1000pg/mL                                                                                                                                                                                                                                                |
| Sensitivitaet            | 7.2pg/mL                                                                                                                                                                                                                                                      |
| Proben                   | serum, plasma, tissue homogenates, cell lysates, cell culture supernatants and other biological fluids                                                                                                                                                        |
| Target-Kategorie         | Human Endocrine Gland Derived Vascular Endothelial Growth Factor (EG-VEGF)                                                                                                                                                                                    |
| Anwendungsbeschreibung   | Assay Length: 3 hours. Experimental Method: Sandwich                                                                                                                                                                                                          |
