| Produktbeschreibung      | eIF2A a translation initiation factor that functions in the early steps of protein synthesis by forming a ternary complex with GTP and initiator tRNA. This complex binds to a 40s ribosomal subunit, followed by mRNA binding to form a 43S preinitiation... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Molekulargewicht         | Calculated MW: 36 kDa, Observed MW: 36 kDa                                                                                                                                                                                                                    |
