| Kategorie                | Biochemikalien                                                                                                                                                                                                                                                                                                 |
| Produktbeschreibung      | A cell-permeable pyrazole derivative that acts as a selective blocker of Stim1 and Orai1-coupled CRAC (Ca <sup>2+</sup> release-activated Ca <sup>2+</sup> ) channel-mediated SOCE (store-operated Ca <sup>2+</sup> entry) in RBL-2H3 cells (IC <sub>50</sub> = 490nM by Fura-2), while exhibiting much red... |
| Molekulargewicht         | 418.3                                                                                                                                                                                                                                                                                                          |
| Reinheit                 | 99% (HPLC)                                                                                                                                                                                                                                                                                                     |
| Formulierung             | Supplied as a light beige solid.                                                                                                                                                                                                                                                                               |
