| Kategorie                | Biochemikalien                                                                                                                                                                                                                                                             |
| Produktbeschreibung      | A cell-permeable dihydroquinolinone compound that acts as a potent, specific, and reversible inhibitor of DNA-binding activity of Late SV40 Factor (LSF) and blocks LSF transactivation (IC <sub>50</sub> =2.1µM in NIH 3T3 cells). Exhibits anti-proliferative activit... |
| Molekulargewicht         | 311.3                                                                                                                                                                                                                                                                      |
| Reinheit                 | 92% (HPLC)                                                                                                                                                                                                                                                                 |
| Formulierung             | Supplied as a white powder.                                                                                                                                                                                                                                                |
