| Immunogen                | COL5A2 (AAH86874.1, 1aa-1139aa) full-length human protein.                                                                                                                                                                                                    |
| Produktbeschreibung      | This gene encodes an alpha chain for one of the low abundance fibrillar collagens. Fibrillar collagen molecules are trimers that can be composed of one or more types of alpha chains. Type V collagen is found in tissues containing type I collagen and ... |
| NCBI                     | <a href="#">86874</a>                                                                                                                                                                                                                                         |
| Reinheit                 | Purified                                                                                                                                                                                                                                                      |
| Formulierung             | Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with horseradish peroxidase (HRP).                                                                                                                                                        |
