| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Hydrolyzes extracellular nucleotides into membrane permeable nucleosides. Exhibits AMP-, NAD-, and NMN-nucleosidase activities. Source: Recombinant protein corresponding to aa28-547 from human 5-nucleotidase, fused to 10X His-Tag at N-terminal and Myc-Tag at C-terminal. |
| Molekulargewicht         | 62.6                                                                                                                                                                                                                                                                           |
| UniProt                  | <a href="#">P21589</a>                                                                                                                                                                                                                                                         |
| Reinheit                 | 90% (SDS-PAGE)                                                                                                                                                                                                                                                                 |
| Formulierung             | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                                             |
