| Hersteller Artikelnummer | E3375-60                                                                                                                                                                                                                                                      |
| Alternativnummer         | USB-E3375-60-1                                                                                                                                                                                                                                                |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Immunogen                | Synthetic phospho-peptides corresponding to residues surrounding Tyr992, Tyr1045 or Tyr1068 of human EGF receptor, respectively.                                                                                                                              |
| Produktbeschreibung      | The Phospho-EGF Receptor Antibody Sampler Kit provides an economical means of evaluating the EGF Receptor and several phosphorylation sites that are involved in its activation. The kit contains enough primary and secondary antibodies to perform two W... |
| Reinheit                 | Purified by Protein A and peptide affinity chromatography.                                                                                                                                                                                                    |
| Formulierung             | Supplied as a liquid in 10mM sodium HEPES, pH 7.5, 150mM sodium chloride, 0.1mg/ml BSA, 50% glycerol.                                                                                                                                                         |
