| Hersteller               | US Biological                                                                                                                                                                                                                                                                         |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                                                     |
| Applikation              | ELISA                                                                                                                                                                                                                                                                                 |
| Produktbeschreibung      | Na <sup>+</sup> / H <sup>+</sup> exchanger regulatory factor (NHERF1) is a PDZ domain containing adaptor protein known to bind to various receptors, channels, cytoskeletal elements and cytoplasmic signaling proteins. A 358aa mainly expressed in kidney, liver and pancreas by... |
| Reinheit                 | Purified                                                                                                                                                                                                                                                                              |
| Formulierung             | Supplied as a lyophilized powder from PBS, 0.05% sodium azide.                                                                                                                                                                                                                        |
