| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Pure Triticum vulgare lectin from wheat germ, covalently linked to colloidal gold (15nm particle size). Lectins are derived from the extracts of plants, animals, viruses and microorganisms and are known to agglutinate red blood cells. These agglutini... |
| Formulierung             | Supplied as a liquid in dH <sub>2</sub> O, pH 7.0-7.5. Labeled with colloidal gold (15nm).                                                                                                                                                                    |
