| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Applikation              | ELISA, IHC, WB                                                                                                                                                                                                                                                |
| Produktbeschreibung      | This lectin is a family of tetrameric glycoproteins consisting of combinations of A and B subunits similar in structure to PHA and GSL I. The dominant isolectins in preparations appear to be B subunit-rich. VVL recognizes preferentially alpha- or bet... |
| Formulierung             | Supplied as a liquid in 10mM HEPES, pH 7.5, 0.15M sodium chloride, 0.1mM Ca++, 0.01mM Mn++, 0.08% sodium azide                                                                                                                                                |
