Von Willebrand Factor, Human (vWF, Factor VIII Related Antigen) USB-V2650

| | |
|--------------------------|--|
| Artikelname | Von Willebrand Factor, Human (vWF, Factor VIII Related Antigen) |
| Artikelnummer | USB-V2650 |
| Hersteller Artikelnummer | V2650 |
| Alternativnummer | USB-V2650-100 |
| Hersteller | US Biological |
| Kategorie | Molekularbiologie |
| Produktbeschreibung | Multimeric Structure of von Willebrand Factor: Each vWF monomer (Mr=260,000) contains a factor VIII binding site near the NH ₂ -terminal end of the molecule. The monomers are joined end-to-end (NH ₂ to NH ₂ and COOH to COOH) by disulfide bonds to form la... |
| Molekulargewicht | 260 |
| Reinheit | 95% by SDS-PAGE. vWF is prepared from citrated human plasma using a combination of the procedures described by Thorell (19), and Lollar (20). A factor VIII free vWF preparation, further purified to ensure removal of factor VIII procoagulant activity, is also available. The preparations are >95% pure as judged by SDS-PAGE under reducing conditions, and consist of large multimers as determined by electrophoresis in SDS/agarose gels. |
| Formulierung | Supplied as a liquid in 0.025M sodium citrate, pH 6.8, 0.1M glycine, 0.1M sodium chloride. |
