| Alternativnummer         | USB-554976-50,USB-554976-100                                                                                                                                                                                                                                  |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Immunogen                | Peptide sequence from Amanita phalloides alpha-amanitin proprotein protein.                                                                                                                                                                                   |
| Produktbeschreibung      | Major toxin from Amanita phalloideae. Acts by binding non-competitively to RNA polymerase II and greatly slowing the elongation of transcripts from target promoters. Applications: Suitable for use in ELISA. Other applications not tested. Recommended ... |
| UniProt                  | <a href="#">P85421</a>                                                                                                                                                                                                                                        |
| Reinheit                 | Purified by Protein G affinity chromatography.                                                                                                                                                                                                                |
| Formulierung             | Supplied as a liquid in 0.01M PBS, pH 7.4, 0.03% Proclin 300, 50% glycerol.                                                                                                                                                                                   |
