| Hersteller               | US Biological                                                                                                                                                                                                                                                  |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                              |
| Applikation              | ELISA                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | Putative human homolog of the proto-oncogene v-akt of the acutely transforming retrovirus AKT8 have been cloned. These protein-serine/threonine kinase proteins have a catalytic domain closely related to both PKA and PKC and have been designated rac (...) |
| Reinheit                 | Purified                                                                                                                                                                                                                                                       |
| Formulierung             | Supplied as a liquid in PBS, pH 7.2, 0.09% sodium azide.                                                                                                                                                                                                       |
