| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | The calcitonin family of bioactive peptides comprises of calcitonin, amylin, two calcitonin-gene related peptides (CGRP1, and CGRP2) and adrenomedullin (ADM). Amylin is a 37aa peptide produced in the pancreatic beta-cell secretory granules and is co-... |
| Molekulargewicht         | 1378.6                                                                                                                                                                                                                                                        |
| Reinheit                 | Highly Purified (~97%)                                                                                                                                                                                                                                        |
| Formulierung             | Supplied as a lyophilized powder. Reconstitute with dH2O to 0.1-1mg/ml.                                                                                                                                                                                       |
