| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                     |
| Produktbeschreibung      | A 10 amino acid peptide sequence mapping near the N-terminus of rat AT II. Angiotensin II mediates its action by interacting with membrane receptor, Angiotensin II type 1 receptors. The signal is transmitted via G-proteins that activates a phosphatid... |
| Reinheit                 | Highly purified                                                                                                                                                                                                                                               |
| Formulierung             | 1mg/ml soln. in PBS, pH 7.4 and 0.09% sodium azide                                                                                                                                                                                                            |
