| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Texas Red is a red-fluorescent dye and when bound to Glycine max (Soybean) Lectin (SBA) can show the binding pattern of this lectin in cellular imaging applications. There is very little overlap between the emission spectra of Texas Red and FITC maki... |
| Reinheit                 | Highly Purified                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in 10mM HEPES, 150mM NaCl, 0.1mM Ions, 0.02% sodium azide. Labeled with Texas Red.                                                                                                                                                       |
