| Produktbeschreibung      | NDUFA8 belongs to the complex I 19kD subunit family. Mammalian complex I is composed of 45 different subunits. This has NADH dehydrogenase activity and oxidoreductase activity. It plays an important role in transferring electrons from NADH to the resp... |
| NCBI                     | <a href="#">055037</a>                                                                                                                                                                                                                                         |
| Formulierung             | Supplied as a lyophilized powder.                                                                                                                                                                                                                              |
