| Produktbeschreibung      | NXT1 encoded by this gene is located in the nuclear envelope. NXT1 has protein similarity to nuclear transport factor 2. NXT1 functions as a nuclear export factor in both RAN (Ras-related nuclear protein) - and CRM1 (required for chromosome region ma... |
| NCBI                     | <a href="#">037380</a>                                                                                                                                                                                                                                        |
| Formulierung             | Supplied as a lyophilized powder.                                                                                                                                                                                                                             |
