| Produktbeschreibung      | Source: Recombinant protein corresponding to aa1-113 from human Kita-kyushu lung cancer antigen 1, fused to 6X His-Tag at N-terminal, expressed in Mammalian cell. Molecular Weight: ~16.8kD Amino Acid Sequence: MNFYLLASSILCALIVFWKYRRFQRNTGEMSSNSTALAL... |
| Molekulargewicht         | 16.8                                                                                                                                                                                                                                                         |
| UniProt                  | <a href="#">Q5H943</a>                                                                                                                                                                                                                                       |
| Reinheit                 | 90% (SDS-PAGE)                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                           |
