| Produktbeschreibung      | Binds sialylated glycoproteins. Source: Recombinant protein corresponding to aa20-263 from human Sialic acid-binding Ig-like lectin 15, fused to 6X His-Tag at N-terminal, expressed in Mammalian cell. Molecular Weight: ~30.6kD Amino Acid Sequence: FVR... |
| Molekulargewicht         | 30.6                                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">Q6ZMC9</a>                                                                                                                                                                                                                                        |
| Reinheit                 | 90% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Formulierung             | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                            |
