| Applikation              | ELISA                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | c-Jun is a component of the transcription factor AP-1, which binds and activates transcription at TRE/AP-1 elements. The transcriptional activity of c-Jun is regulated by phosphorylation at Ser63 and Ser73 (1,2). Extracellular signals including growth... |
