| Hersteller               | US Biological                                                                                                                                                                                                                                                |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                            |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                    |
| Produktbeschreibung      | Collagen is an inert, rigid protein found predominantly in skin, ligaments, bones and teeth. Its most distinctive attribute, essential to a transmitter of mechanical force, is inelasticity. Its fundamental structural unit is tropo-collagen, a molecu... |
| Reinheit                 | Purified by ion exchange chromatography. IEP Assay shows a single precipitin arc against source serum protein and IgG.                                                                                                                                       |
| Formulierung             | Supplied as a liquid in 0.5M sodium acetate, pH 4.5, 0.01% sodium azide.                                                                                                                                                                                     |
