| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Collagen is the main structural protein in the extracellular space and is the most abundant protein in the ECM. Collagens are divided into two classes - fibril (types I, II, III, V) and non-fibril (types IV, VI). Type V collagen is a minor connective... |
| Reinheit                 | Controlled and limited pepsin digestion, followed by selective salt precipitation. 90% as judged by SDS-PAGE analysis.                                                                                                                                        |
| Formulierung             | Supplied as a liquid in 500mM acetic acid.                                                                                                                                                                                                                    |
