| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | A 20 aa peptide sequence within the cytoplasmic, C-terminal domain of rat GLYT1 . The glycine transporter belongs to a family of Na/Cl-dependent neurotransmitter transporters, predicted to contain as many as 12 transmembrane domains. Glycine receptor... |
| Reinheit                 | Highly purified                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in PBS, pH 7.2, 0.09% sodium azide                                                                                                                                                                                                       |
