| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | GSK-3beta is a Serine/Threonine protein kinase that was originally identified as the kinase that phosphorylates and inhibits glycogen synthase (1). GSK-3beta is ubiquitously present in human tissues and implicated in the regulation of several physiol... |
| NCBI                     | <a href="#">002093</a>                                                                                                                                                                                                                                        |
| Reinheit                 | 90% by densitometry                                                                                                                                                                                                                                           |
| Formulierung             | Supplied as a liquid in 50mM Tris-HCl, pH 7.5, 150mM sodium chloride, 0.25mM DTT, 0.1mM EGTA, 0.1mM EDTA, 0.1mM PMSF, 25% glycerol.                                                                                                                           |
