| Hersteller               | US Biological                                                                                                                                                                                                                                               |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                           |
| Applikation              | ELISA                                                                                                                                                                                                                                                       |
| Produktbeschreibung      | GSL I is a family of glycoproteins with molecular weights of approximately 115,000. There are two types of subunits, termed "A and "B, with slightly different molecular weights. These subunits combine to form tetrameric structures, resulting in fiv... |
| Reinheit                 | Homogeneous by SDS-PAGE                                                                                                                                                                                                                                     |
| Formulierung             | Supplied as a lyophilized powder. Reconstitute with 10mM HEPES, pH 8.5, 0.1mM Ca++.                                                                                                                                                                         |
