| Alternativnummer         | USB-P6300-40I-100                                                                                                                                                                                                                                                |
| Hersteller               | US Biological                                                                                                                                                                                                                                                    |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                                |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | A 18 mer peptide locating near the amino terminus of Presenilin-2 .<br>Alzheimers Disease (AD) is a neurodegenerative disorder characterized by progressive loss of memory and cognition in the elderly. A number of genes have been linked in the initiation... |
| Reinheit                 | Chromatographically purified                                                                                                                                                                                                                                     |
| Formulierung             | Supplied as a liquid in PBS, pH 7.4, 0.02% sodium merthiolate.                                                                                                                                                                                                   |
