| Hersteller               | Biorbyt                                                                                                                |
| Wirt                     | Goat                                                                                                                   |
| Kategorie                | Antikörper                                                                                                             |
| Applikation              | ELISA, IHC, IHC-P, WB                                                                                                  |
| Spezies Reaktivität      | Canine, Hamster, Human, Monkey, Mouse, Rabbit                                                                          |
| Immunogen                | Peptide with sequence C-GLRPPYPTADHMLA, from the C-Terminus of protein sequence according to NP_002221.1, NP_068831.1. |
| Konjugation              | Unconjugated                                                                                                           |
| Produktbeschreibung      | JUP/CTNNG/Junction Plakoglobin Antibody...                                                                             |
| Klonalität               | Polyclonal                                                                                                             |
| Konzentration            | 0.5 mg/ml                                                                                                              |
| Puffer                   | TBS, pH 7.3, 0.02% Sodium Azide, 0.5% rAlbumin                                                                         |
| Target-Kategorie         | JUP/CTNNG/Junction Plakoglobin                                                                                         |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | IHC, IHC-P (5 µg/ml), Peptide-ELISA (1:32000), WB (0.1 - 0.3 µg/ml)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Anwendungsbeschreibung | <p>Application Notes: Further information: Immunohistochemistry: This was validated for use in immunohistochemistry on a panel of 21 formalin-fixed, paraffin-embedded (FFPE) human tissues after heat induced antigen retrieval in pH 6.0 citrate buffer. After incubation with the primary antibody, slides were incubated with biotinylated secondary antibody, followed by alkaline phosphatase-streptavidin and chromogen. The stained slides were evaluated by a pathologist to confirm staining specificity. The optimal working concentration was determined to be 5 ug/ml</p> |
