Human Interferon Beta (IFN-beta) Microsample Fast ELISA Kit BYT-ORB1806668

Artikelname	Human Interferon Beta (IFN-beta) Microsample Fast ELISA Kit
Artikelnummer	BYT-ORB1806668
Hersteller Artikelnummer	orb1806668
Alternativnummer	BYT-ORB1806668-48,BYT-ORB1806668-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Produktbeschreibung	Human Interferon Beta (IFN-beta) Microsample Fast ELISA Kit...
Detektionsbereich	31.25-2000pg/mL
Sensitivitaet	18.75 pg/mL
UniProt	P01574
Formulierung	Ready to use
Proben	Macrophage culture supernatant, bone marrow mesenchymal stem cell supernatant,Sample volume:25µL
Target-Kategorie	IFN-beta

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human IFN-beta. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody and biotinylated detection antibody specific for Human IFN-beta. Then Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human IFN-beta, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human IFN-beta. You can calculate the concentration of Human IFN-beta in the samples by comparing the OD of the samples to the standard curve
