Rat Decay Accelerating Factor (DAF) ELISA Kit BYT-ORB1948488

Artikelname	Rat Decay Accelerating Factor (DAF) ELISA Kit
Artikelnummer	BYT-ORB1948488
Hersteller Artikelnummer	orb1948488
Alternativnummer	BYT-ORB1948488-48,BYT-ORB1948488-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Rat
Produktbeschreibung	Rat Decay Accelerating Factor (DAF) ELISA Kit...
Detektionsbereich	31.25-2000pg/mL
Sensitivitaet	18.75 pg/mL
Proben	serum, plasma, Tissue homogenate and Other biological samples
Target-Kategorie	DAF

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat DAF. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat DAF and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat DAF, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Rat DAF. You can calculate the concentration of Rat DAF in the samples by comparing the OD of the samples to the standard curve
