Human Lymphotoxin Beta Receptor (LTbetaR) ELISA Kit BYT-ORB1949758

Artikelname	Human Lymphotoxin Beta Receptor (LTbetaR) ELISA Kit
Artikelnummer	BYT-ORB1949758
Hersteller Artikelnummer	orb1949758
Alternativnummer	BYT-ORB1949758-48, BYT-ORB1949758-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Produktbeschreibung	Human Lymphotoxin Beta Receptor (LTbetaR) ELISA Kit...
Detektionsbereich	0.32-20ng/mL
Sensitivitaet	0.19 ng/mL
UniProt	P36941
Proben	Tissue homogenate and Cell lysate
Target-Kategorie	LTbetaR

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human LTbetaR. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human LTbetaR and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human LTbetaR, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human LTbetaR. You can calculate the concentration of Human LTbetaR in the samples by comparing the OD of the samples to the standard curve
