## Product Datasheet

### Human Insulin Degrading Enzyme (IDE) ELISA Kit BYT-ORB1949762

Artikelname	Human Insulin Degrading Enzyme (IDE) ELISA Kit
Artikelnummer	BYT-ORB1949762
Hersteller Artikelnummer	orb1949762
Alternativnummer	BYT-ORB1949762-48, BYT-ORB1949762-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Produktbeschreibung	Human Insulin Degrading Enzyme (IDE) ELISA Kit...
Detektionsbereich	62.5-4000pg/mL
Sensitivitaet	37.5 pg/mL
UniProt	<a href="#">P14735</a>
Proben	plasma
Target-Kategorie	IDE

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human IDE. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human IDE and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human IDE, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Human IDE. You can calculate the concentration of Human IDE in the samples by comparing the OD of the samples to the standard curve
