Anwendungsbeschreibung	Solubility: It is recommended to reconstitute the lyophilized Growth Hormone Carp recombinant in sterile 18MO-cm H ₂ O not less than 100µg/ml, which can then be further diluted to other aqueous solutions. Biological Activity: Carp GH is biologically active in rat 3T3 F442A preadipocytes, though its activity is 15-fold lower compared to bovine GH, but it is equally potent in vivo in promoting carp growth (Fine et al.1993). Furthermore, carp GH forms 1:2 complex with the extra cellular domain of ovine growth hormone receptor. Application Notes: Cytokines And Growth Factors
