Aspartate Aminotransferase (AST/GOT) Activity Colorimetric Assay Kit BYT-ORB1173220

Artikelname	Aspartate Aminotransferase (AST/GOT) Activity Colorimetric Assay Kit
Artikelnummer	BYT-ORB1173220
Hersteller Artikelnummer	orb1173220
Alternativnummer	BYT-ORB1173220-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Produktbeschreibung	This kit detects AST/GOT activity by catalyzing the transamination of alpha-ketoglutarate and L-aspartic acid to produce pyruvate. The rate of absorbance increase at 505 nm is used to calculate AST/GOT activity....
Anwendungsbeschreibung	Application Notes: The kit provides a simple method for detecting AST/GOT activity in a variety of biological samples such as animal tissues, plant tissues, cell culture: adherent or suspension cells, serum, bacterial. In the assay, Aspartate aminotransferase (AST) catalyzes the transamination reaction of alpha-ketoglutarate and L-aspartic acid at 37C and pH 7.4 to produce glutamic acid and pyruvate, Pyruvate can interact with 2,4- Dinitrophenylhydrazine to produce pyruvate phenylhydrazone, which appears brownish red under alkaline conditions and has a characteristic absorption peak at 505 nm. The rate of pyruvate phenylhydrazone increase at 505 nm can reflect AST/GOT activity
