Anwendungsbeschreibung	Application Notes: Peptide ELISA: antibody detection limit dilution 1:32000. Western Blot: Approx 125kDa band observed in Mouse fetal Kidney lysates (calculated MW of 133kDa according to NP_001074519.2). Recommended concentration: 0.3-1µg/mL. An additional band of unknown identity was also consistently observed at 150kDa. This band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any such results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?
