Anwendungsbeschreibung

Application Notes: ELISA: Peptide ELISA: antibody detection limit dilution 1:2000.WB: Preliminary experiments gave an approx 80kDa band in Human Spleen and Testis lysates after 1 µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 106kDa according to NP\_004612.2. The 80kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates Have any further splice variants/modified forms been reportedExperiment Notes: FACS: This antibody has been proven to specifically react to TRPC6 in FACS
