## Product Datasheet

### Chicken Interferon Beta (IFN $\beta$ ) ELISA Kit BYT-ORB775988

Artikelname	Chicken Interferon Beta (IFN $\beta$ ) ELISA Kit
Artikelnummer	BYT-ORB775988
Hersteller Artikelnummer	orb775988
Alternativnummer	BYT-ORB775988-48, BYT-ORB775988-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Gallus
Produktbeschreibung	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Interferon Beta(IFN $\beta$ )....
Konzentration	200 pg/mL
Detektionsbereich	3.13-200 pg/mL
Sensitivitaet	1.24 pg/mL
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Application Notes: standard: 200 pg/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Chicken IFN $\beta$ . Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Chicken IFN $\beta$ . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Chicken IFN $\beta$ , biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Chicken IFN $\beta$  in the samples is then determined by comparing the OD of the samples to the standard curve
