Product Datasheet

Human Maltase Glucoamylase, Intestinal (MGA) ELISA Kit BYT-ORB776205

Artikelname	Human Maltase Glucoamylase, Intestinal (MGA) ELISA Kit
Artikelnummer	BYT-ORB776205
Hersteller Artikelnummer	orb776205
Alternativnummer	BYT-ORB776205-48, BYT-ORB776205-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human
Produktbeschreibung	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Maltase Glucoamylase, Intestinal(MGA)....
Konzentration	100 ng/mL
Detektionsbereich	1.57-100 ng/mL
Sensitivitaet	0.56 ng/mL
UniProt	O43451
Proben	Tissue homogenates, cell lysates and other biological fluids.

Anwendungsbeschreibung

Application Notes: standard: 100 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human MGA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human MGA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human MGA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human MGA in the samples is then determined by comparing the OD of the samples to the standard curve
