Product Datasheet

Human Myelin Oligodendrocyte Glycoprotein (MOG) ELISA Kit BYT-ORB776228

Artikelname	Human Myelin Oligodendrocyte Glycoprotein (MOG) ELISA Kit
Artikelnummer	BYT-ORB776228
Hersteller Artikelnummer	orb776228
Alternativnummer	BYT-ORB776228-48, BYT-ORB776228-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human
Produktbeschreibung	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Myelin Oligodendrocyte Glycoprotein(MOG)....
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.054 ng/mL
UniProt	Q16653
Proben	tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Application Notes: standard: 10 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human MOG. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human MOG. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human MOG, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human MOG in the samples is then determined by comparing the OD of the samples to the standard curve
