Rat Macrophage Derived Chemokine (MDC) ELISA Kit BYT-ORB776410

Artikelname	Rat Macrophage Derived Chemokine (MDC) ELISA Kit
Artikelnummer	BYT-ORB776410
Hersteller Artikelnummer	orb776410
Alternativnummer	BYT-ORB776410-48, BYT-ORB776410-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Rat
Produktbeschreibung	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Macrophage Derived Chemokine(MDC)....
Konzentration	1500 pg/mL
Detektionsbereich	23.44-1500 pg/mL
Sensitivitaet	8.72 pg/mL
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Application Notes: standard: 1500 pg/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat MDC. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat MDC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat MDC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat MDC in the samples is then determined by comparing the OD of the samples to the standard curve
