## Product Datasheet

### Human Protein C Inhibitor (PCI) ELISA Kit BYT-ORB776900

Artikelname	Human Protein C Inhibitor (PCI) ELISA Kit
Artikelnummer	BYT-ORB776900
Hersteller Artikelnummer	orb776900
Alternativnummer	BYT-ORB776900-48, BYT-ORB776900-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human
Produktbeschreibung	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Protein C Inhibitor(PCI)....
Konzentration	2000 pg/mL
Detektionsbereich	31.25-2000 pg/mL
Sensitivitaet	13.6 pg/mL
Proben	plasma

Anwendungsbeschreibung

Application Notes: standard: 2000 pg/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human PCI. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human PCI. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human PCI, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human PCI in the samples is then determined by comparing the OD of the samples to the standard curve
