Product Datasheet

Human Ferritin, Light Polypeptide (FTL) ELISA Kit BYT-ORB776984

Artikelname	Human Ferritin, Light Polypeptide (FTL) ELISA Kit
Artikelnummer	BYT-ORB776984
Hersteller Artikelnummer	orb776984
Alternativnummer	BYT-ORB776984-48, BYT-ORB776984-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human
Produktbeschreibung	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Ferritin, Light Polypeptide(FTL)....
Konzentration	20 ng/mL
Detektionsbereich	0.32-20 ng/mL
Sensitivitaet	0.129 ng/mL
UniProt	P02792
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Application Notes: standard: 20 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human FTL. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human FTL. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human FTL, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human FTL in the samples is then determined by comparing the OD of the samples to the standard curve
